

2021

Annual Report

Don't ever let injustice go by unchallenged

Vaccination and testing in Middlebrook Mobile Home

2021 brought further Covid-19 waves and renewed problems for exhausted populations. These challenges inspired us to grow and extend our services to prevent the exclusion of underserved members of our communities. Our vaccination efforts for adults have continued, and we also responded to a call to immunize children against Covid-19.

Care for Your Health has continued to work tirelessly and is even more determined to develop and provide much needed services to the elderly and homebound. We have continued to strengthen our ties to other organizations fighting health care inequities in black and brown communities. We are also working toward implementing structural changes to facilitate aging in place and caring for the deeply intertwined physical and mental health of our patients and their caregivers.

Hospital at home blood draw

And yet, we do not work in isolation. Our **growth** and success has been made possible by the dedication of our staff, the trust of the community and our **partners** in the private and public sectors. Together we have woven a net of resilience that supports our communities in need.

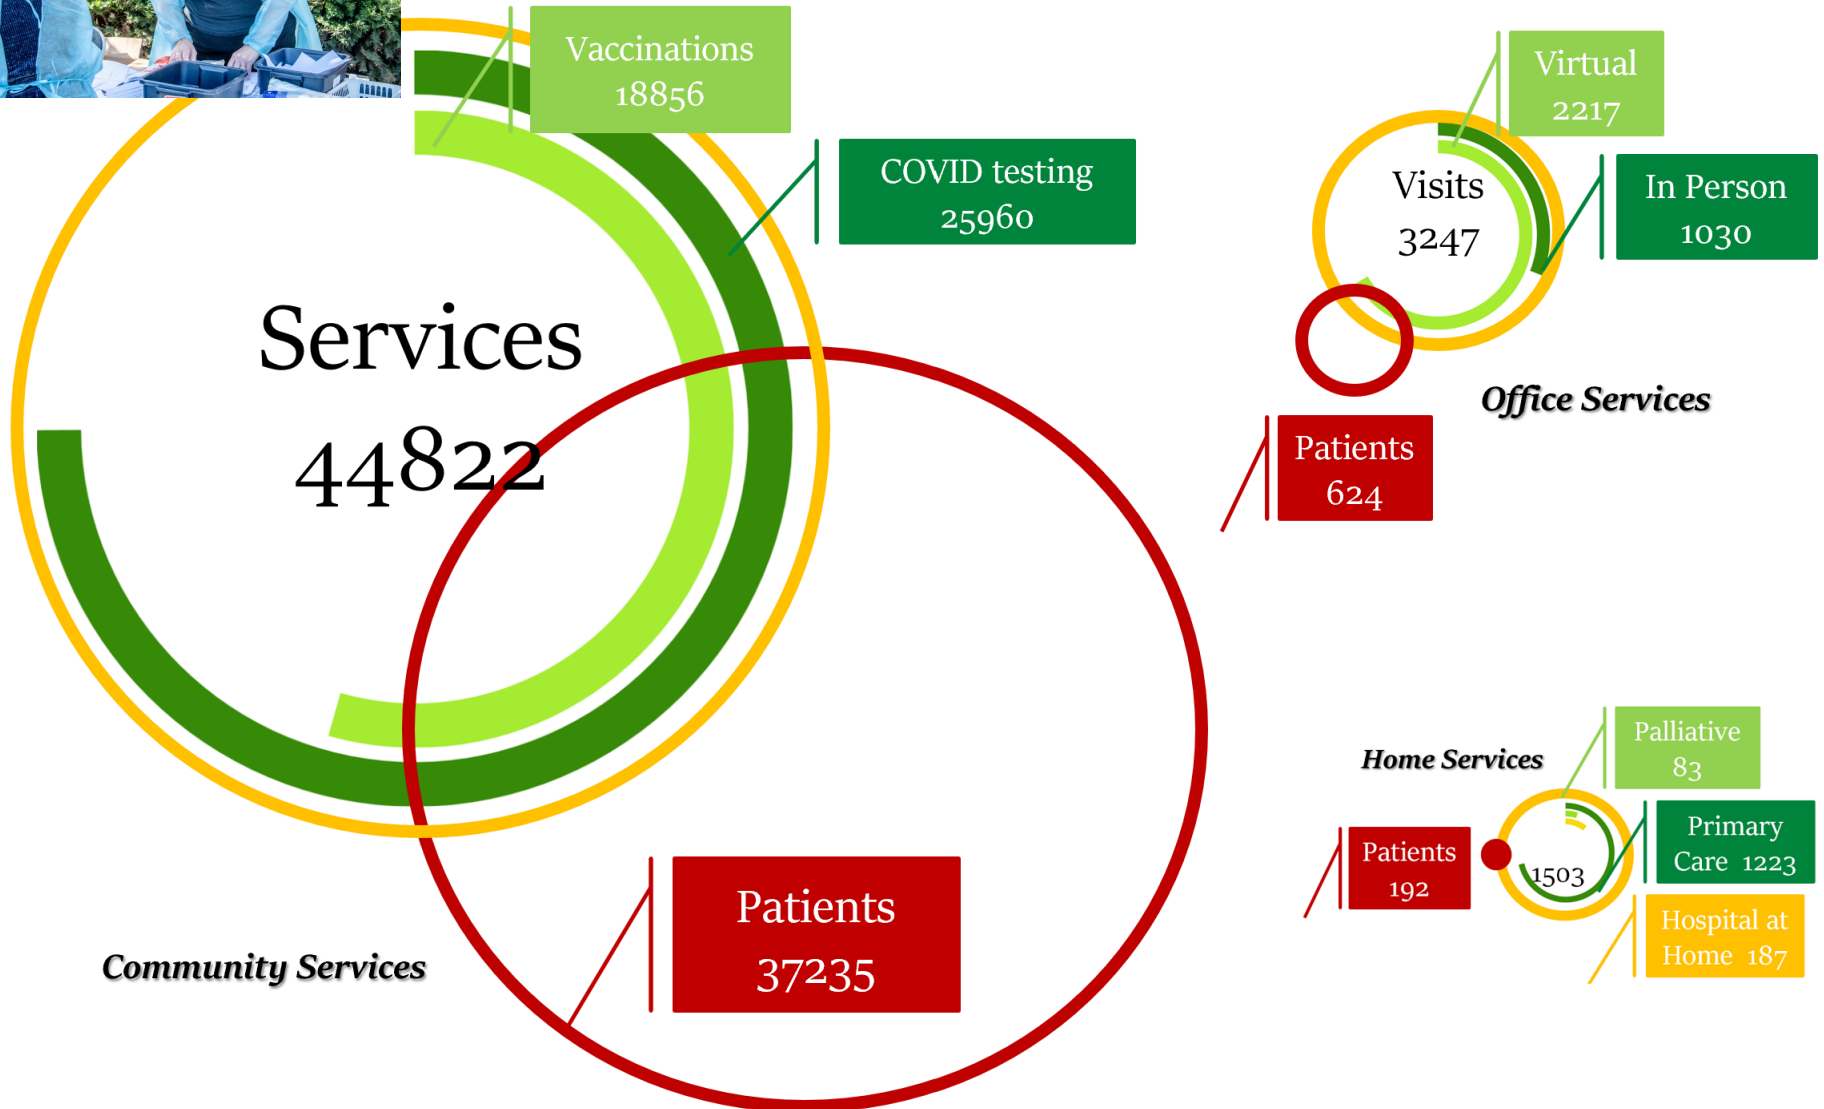

As our projects for expansion in Germantown and Silver Spring advance, we hope to continue to partner with all of you to build a better future for all.

WHAT WE DID

Testing at Germantown Hub

Number of services provided and patient served by service line

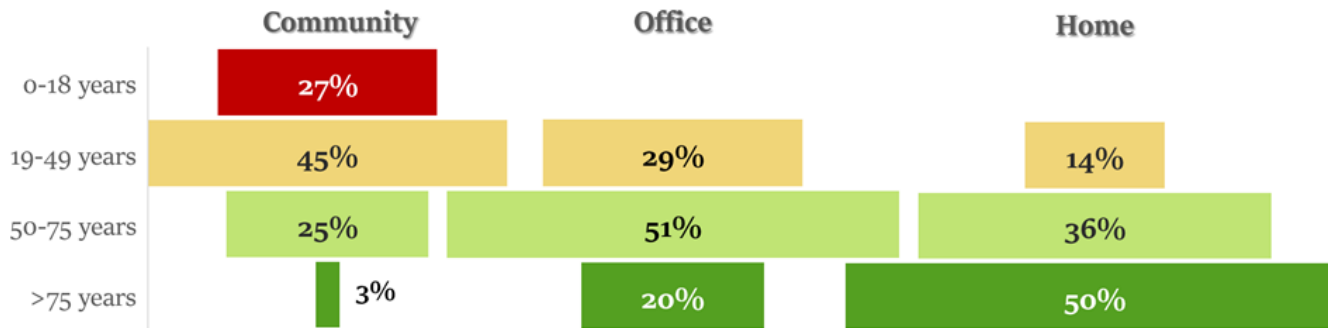

WHO WE SERVED

Description of the population that received services from Care for Your Health

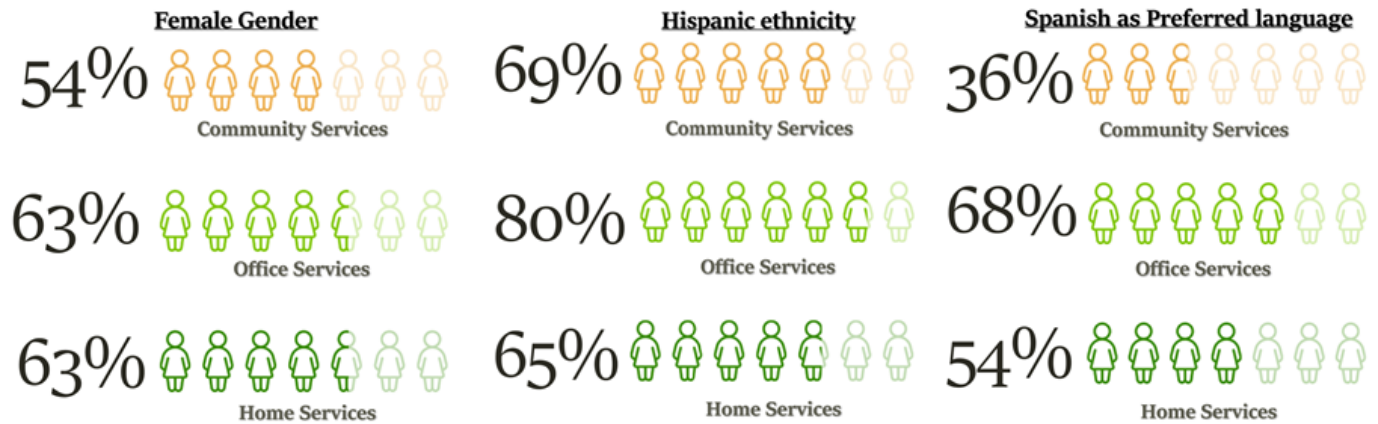

On average, patients seen at home are older.

Age of individuals receiving services

Hospital at Home patients—(Discharged to Primary Care at Home)

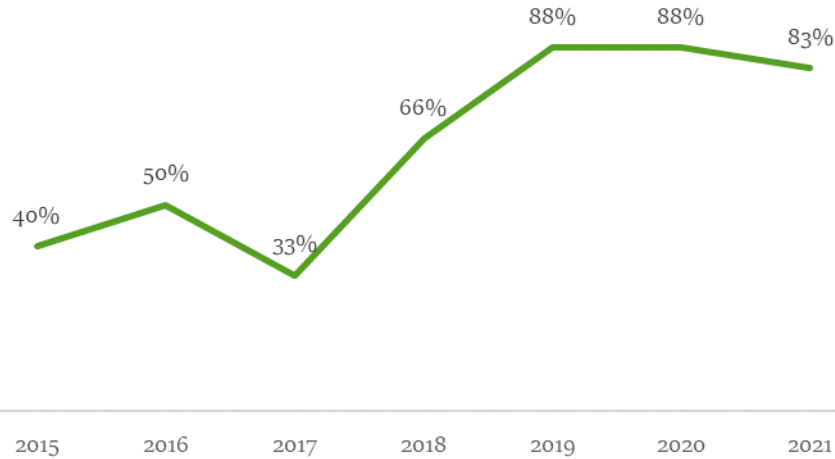

A large proportion of our patients are Spanish speaking Latino females.

HOW WE DID

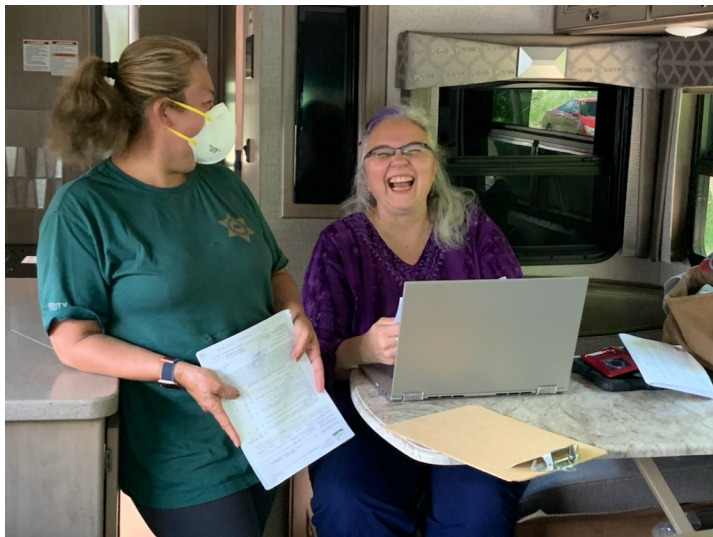

Quality of care provided by Care for Your Health, Inc

Positive Outcome

Outcome measure

OUR OUTCOME MEASURE FOR AGING IN PLACE IS PLACE OF DEATH. A POSITIVE OUTCOME IS DYING AT HOME, HOSPICE OR ASSISTED LIVING SURROUNDED BY YOUR LOVED ONES. A NEGATIVE OUTCOME IS DYING IN THE HOSPITAL, A NURSING HOME OR PLACE OF DEATH IS UNKNOWN.

Community testing event in the C4YH -RV

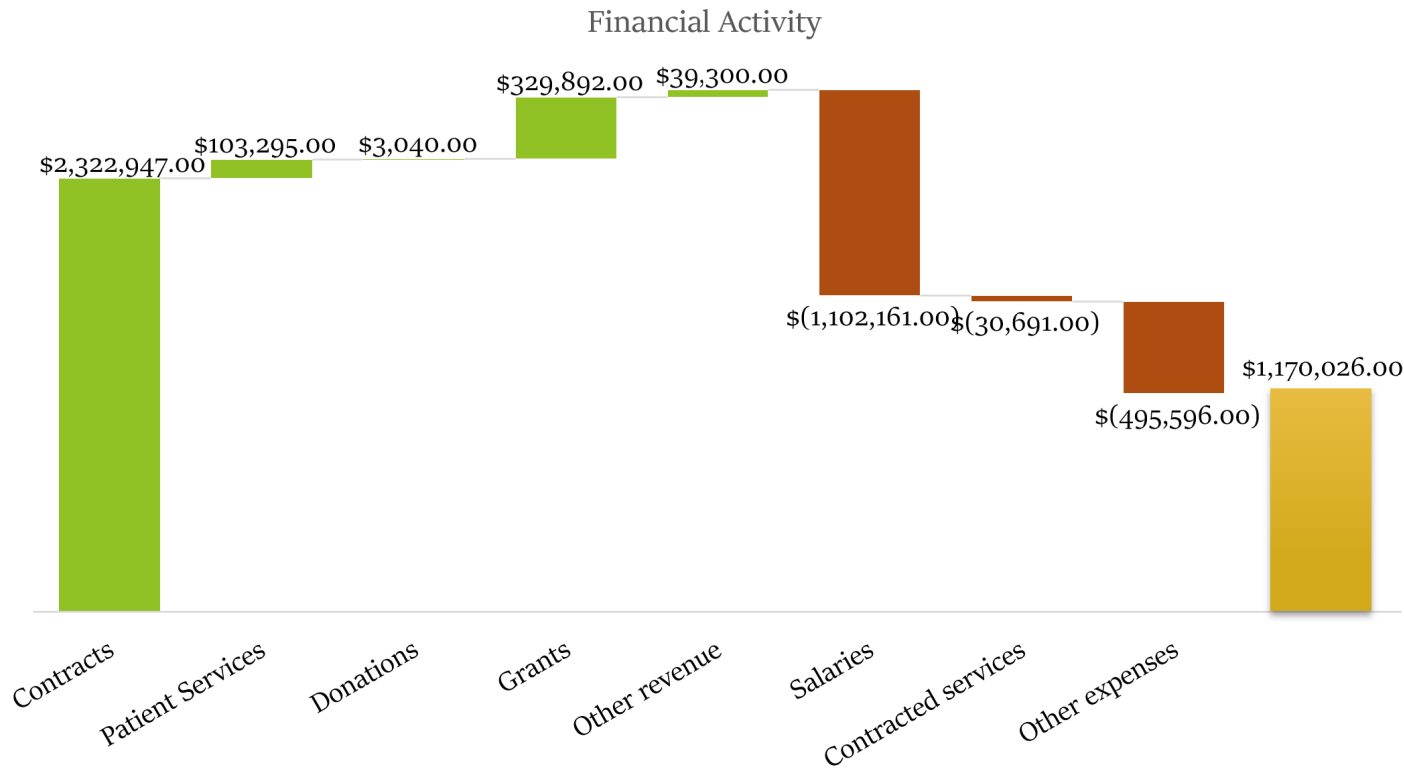

3/4

Patients that have advanced directives or a designated health care agent.

83%

Patients that have falls screens and a plan to avoid future falls if they are high risk.

WE ARE THANKFUL

Thank you to all our funders, partners and donors that help us advance our fight for social justice

The Healthcare Initiative Foundation has invested in our community and homebased work. With their funding we were able to initiate our Covid-19 vaccination efforts to adults in early March. We were also able to partner with MCPS to administer vaccines for children in the schools. Finally, their support allowed us to maintain and expand the infrastructure of the hospital at home.

Funding from Howard County assisted our vaccination efforts in the County.

The Maryland Community Health Resources Commission has provided funds to support our Hospital at Home initiative

Cloudbreak foundation supported our Home based Transitions of Care work.

We were able to enhance our telehealth infrastructure with the support of the Greater Washington Community Foundation

With the support of the County Executive, Montgomery County's Council and the Department of Health and Human services, we were able to be an active participant in the *Por Nuestra Salud y Bienestar* program caring for over 30,000 community members.
